SUMMARY

Deeply passionate developer with ***5+ years*** of coding experience spanning both ***frontend*** and ***backend*** development. Specialized ability to mentor and innovate new solutions coming from deep rooted knowledge that started at a young age. Seeking a challenging and fulfilling role for skill growth.

EXPERIENCE

My Coding Place — *Coding Teacher*

September 2025 - May 2026, Austin (on-site)

- Developed game projects for students that showcase coding concepts.
- Taught students to build various projects and games using Scratch.

Ripple Learning LLC— *Full Stack Developer*

February 2024 - April 2024, Austin (remote)

- Led development of backend code to integrate OpenAI's ChatGPT API for client's web application, accounting for over 25% of the project's total code contribution.
- Collaborated with both frontend and backend team to deliver above and beyond work by deadlines.
- Supported less-experienced developers with more complicated tasks—saving hours of development time.

Chaparral Star Academy — *IT Team Intern*

August 2019 - June 2020, Austin (on-site)

- Designed an electronically accessed Chromebook storage container using a Raspberry Pi which students used to store equipment nightly.
- Gained hands-on experience in Python while learning crucial team coordination, project planning, and time management practices.

EDUCATION

Austin Coding Academy — *Boot Camp*

June 2022 - April 2023, St. Edward's University, Austin

- A one year, on campus coding boot camp focusing on teaching the essentials of web development.
- Learned essential full stack web and app development skills trained through daily solo and group projects.

SKILLS

Heart for People

PROJECTS

Living Planet: Platforming game with custom engine, art, animations and music.

Max1M: My personal AI assistant customized with a face and internal apps.

Charging Cabinet: Station to charge chromebooks nightly, locked electronically.

Mean It: A translator app utilizing OpenAI to translate intentions more than words.

ADDITIONAL INFO
