

Riley Underwood

Full Stack Developer / Coding Teacher

Website: boltenbeeper.github.io/portfolio/

SUMMARY

Extremely passionate, creative, and driven Full Stack Software Engineer with 5+ years of coding practice in both frontend and backend development across multiple languages and platforms. Specialized ability to mentor and innovate coming from deep rooted knowledge that started at a young age, bringing a variety of experience from web development, game design, and graphic design. Always striving to learn and grow and seeking a role that inspires both.

EXPERIENCE

My Coding Place, Austin — Coding Teacher

September 2025 - Present

- Instruct students to build various projects and games using Scratch.
- Develop projects for students that showcase coding concepts.

Ripple Learning LLC, Austin — Full Stack Developer

February 2024 - April 2024

- Led development of backend code to integrate OpenAI's ChatGPT API for client's web application, accounting for over 25% of the project's total code contribution.
- Worked closely with both frontend and backend team to deliver above and beyond work by deadlines, aiding less experienced developers with more complicated tasks and saving large amounts development time.

Chaparral Star Academy, Austin — IT Team Intern

August 2019 - June 2020

- Designed an electronically accessed Chromebook storage container using a Raspberry Pi which students used to store equipment nightly.
- Gained hands-on experience in Python while learning crucial team coordination, project planning, and time management practices.

EDUCATION

Austin Coding Academy, St. Edward's University, Austin — Boot Camp

June 2022 - April 2023

- A one year, on campus coding boot camp focusing on teaching the essentials of web development.
- Learned essential web development and full stack app development skills trained through daily solo and group projects.
